

# INTERNATIONAL PARTNERSHIP IN COMPUTER SCIENCE

 ***Acces a pool of talents***

# WHO IS ISIMA?

▶ **HIGHER INSTITUTE IN COMPUTER SCIENCE FOR 30+ YEARS**

## ▶ ISIMA IN NUMBERS

**1 000**  
students

**250**  
master's level  
graduates

**70+** possibilities  
of exchange  
in **30+** countries

## ▶ OUR STUDENTS' STRENGTHS

- ▶ Minimum B2-level English certification
- ▶ Introduction to research
- ▶ Cutting-edge technics

▶▶ **BECOME AN INTERNATIONAL PARTNER OF ISIMA !**

# THEY TRUST US

Our academic partners with double-degree agreements:

## SUCCESS STORY

### M. Vogel

*Product Owner in Agile Software Development at SIEMENS (Germany)*

In 1996, a collaboration began between ISIMA and the Siemens AG site in Karlsruhe. Who would have thought back then that this relationship would still exist in 2026, after 30 years.

In 2003, I met the first intern from the university, and we've had students here every year since.

In total, our partnership has facilitated 113 internships for 98 interns.

It's always great to work with young people, as they bring fresh ideas. I would assert that ISIMA students have above-average qualifications, and our supervisors were very satisfied with the interns' performance.

Almost all of them worked very independently and integrated well into the teams.

Today, 4 former ISIMA students work here on site, one of them was the first intern from 1996. I hope and expect that we will continue to offer many internships to ISIMA students in the future, and I look forward to continuing good collaboration.

### Paul Bonhomme

*Software Development Engineer at Industrious (Canada)*

As an ISIMA graduate, I completed my end-of-studies internship in Montreal at Industrious, in an international environment.

This experience allowed me to develop both my technical skills and my ability to adapt to new professional contexts.

It was a defining moment in my academic and professional path and led to me being hired on-site.

In my opinion, an internship abroad is a unique opportunity for personal and professional growth and enrichment.
